

Environmental Policy

Qualvis Print & Packaging recognises that concern for the environment should be an integral and fundamental part of our business. We are aware of the impact that our business activities have on the environment; our objective is to balance the need to achieve our business aims with an effort towards sustainable environmental improvement, which can be measured and monitored on a regular basis.

The company is committed to managing the environmental aspects arising from its operational activities and minimising the impact of those operations on the environment by means of a programme of continuous improvement. In particular we will:

- Set clear objectives and targets with the aim of ensuring continual improvement of our environmental performance;
- Conduct our operations to ensure compliance with all relevant environmental legislation and to all other requirements relating to our environmental aspects;
- Show a continual commitment to the prevention of pollution through the use of operational controls and training;
- Make efficient use of resources, reuse rather than dispose where possible and promote the use of recycled materials;
- Improve waste management and reduce waste to landfill where possible;
- Aim to minimise energy consumption through effective energy management;
- Implement effective carbon management tools;
- Provide the necessary training and support to all employees to ensure that they understand and are able to fulfil the relevant aspect of this Policy in their work.

To reinforce these policy commitments, senior management are committed to the continuous improvement by establishing and reviewing quality, environmental and health & safety objectives for all areas of the company.

This ensures that the company operates effectively and efficiently, remains focussed on the needs of its customers whilst reducing risks to health, safety and the environment.

The effectiveness of the system is monitored and reviewed through planned audits, management reviews and the implementation of effective corrective and preventive action processes.

Appropriate resources will be made available to ensure that these policy commitments are maintained. This Policy is communicated to all employees, is available to the public and is reviewed for continuing suitability.
